

Network Flow Monitoring – Integration of ntop & Checkmk

CHECKMK CONFERENCE #6 – MUNICH, APRIL 28, 2020

Alex Wilms
Consultant
tribe29

Jan Justus
CEO
tribe29

Simone Mainardi
Lead Engineer
ntop

Agenda

1. WHY NETWORK FLOW MONITORING?
2. WHAT IS NTOP?
3. HOW IS NTOP INTEGRATED IN CHECKMK?
4. HOW DO I GET IT?
5. Q&A?!

Integrate network flow monitoring in Checkmk

What you already get from Checkmk

- Network performance monitoring & metrics
 - Bandwidth (e.g. bits in/out)
 - Packet rate
 - Error rate
- Network interface status and speed
- (Default) Thresholds / alarming

What you might want to do in addition

- Deeper root cause analyses (e.g. quick identification of network bottlenecks)
- Network flow analyses (e.g. top talkers, ...)
- In-depth performance monitoring (e.g. delay, round-trip-times, ...)
- Support threat detection (e.g. quick identification of threats like DDoS attacks)

Flows – data summarized for a set of packets

A 'Flow' is a set of packets with a set of common properties. Vice versa, all packets of e.g. a web session can be summarized in a flow.

Typical flow data tells you that...

2) ...by a client, which communicated with...

4) ...for 5 days, 15 hours, 09 minutes and 21 seconds...

6) ...transferring 350.26 GB of data

	Application	Protocol	Client	Server	Duration	Score	Breakdown	Actual Thpt	Total Bytes▼	Info
Info	IPsec	UDP	116.202.64.94:ipsec-nat-t	Kellerstraße:ipsec-nat-t	5 Days, 15:09:21	60	Client Server	20.96 Mbit/s ↓	350.26 GB	

1) An IPsec flow...

3) ...a server with an alias set...

5) ...equally distributed between client and server...

Various protocols & sources provide flow data

Switch	Router	Miscellaneous
• sFlow	• NetFlow v5/v9 • NetFlow Lite • IPFIX	• Mirror Port • eBPF

ntop – a specialist in network flow analyses (and more!)

- Software company from Pisa, Italy
- Started as open source project in 1998 evolving into fully fledged software solution for network flow analysis, DPI, ...
- Independent from third-party companies
- Serving many customers for more than 10 years

Integrations available from Checkmk 1.7

- **Traffic dashboard:** Main dashboard (top talkers etc.) available in Checkmk
- **Alerts:**
 - Provide ntop “detected alerts” list + “alert summary” in Checkmk
 - Allow specific ntop alarms to trigger notifications in Checkmk
- **Flows:** Flow information available in Checkmk
- **Host details:** Relevant ntop data looking at a host in Checkmk
- **ntop graphing building blocks:** Enables specific ntop graphics to be included in views

It's demo time

Get network flow monitoring with Checkmk 1.7

Product

Purchase:

- ntop resold by Checkmk
- Checkmk-ntop integration addon (MKP)

Download:

- Checkmk-ntop integration add-on from Checkmk
- ntop download directly from ntop servers or via appliance option

Consulting & Support

Checkmk-ntop-integration add-on:

- Checkmk or Checkmk partner

Ntop: Two major options

- 1st/2nd level come in via Checkmk support / Checkmk partner, routed to ntop specialist partner, who delivers support (D, EN, IT). 3rd level from ntop
- Directly from ntop

Our focus: make the experience as much „one-face-to-the-customer“ as possible

Any questions?

Thank you
